GitHub • Portfolio

CORE SKILLS

Python • Django
JavaScript • HTML5 • CSS3
PostgreSQL • SQLite • SQL
Django ORM • Authentication
REST APIs • DRF
Bootstrap • Responsive UI
Git • GitHub • VS Code
Railway • PythonAnywhere
WhiteNoise • Unicorn

BUSINESS SYSTEMS

- Multi-business platforms
- Operational dashboards
- Workflow automation
- Role-based access
- Reporting & billing
- WhatsApp integrations
- Database modelling

AI & APIS

Groq API
LLM integration
face-api.js
TensorFlow.js
Fetch / AJAX
JSON processing

EDUCATION

Web Programming Bootcamp

Certificate | 2026

Code College | Full-Stack Web
Development

Python/Django, JavaScript, databases and
APIs.

Diploma in Tour Operations

Rosebank College, Braamfontein

Matric

EPP Mhinga High School

PROFESSIONAL PROFILE

Junior Python/Django Full-Stack Developer and founder of Edvance Tech, focused on turning real operational problems into practical web-based systems. I build and deploy Django applications that combine PostgreSQL, authentication, workflow automation, reporting, JavaScript interfaces and third-party integrations. My recent work includes multi-business platforms for car-wash operations and auto-parts quotations, an ordering and settlement system for a food business, and a production footwear catalogue.

EDVANCE TECH - FOUNDER & FULL-STACK DEVELOPER

2026 - Present | Business software, client websites and SaaS-style platforms

- Design, build and deploy end-to-end Django applications for practical business workflows.
- Translate operational requirements into database models, dashboards, authentication flows, reporting and customer-facing interfaces.
- Manage production deployment and configuration using PostgreSQL, Railway, Unicorn, WhiteNoise and environment variables.
- Build systems with business-specific workflows including platform billing, multi-business account separation, QR access and WhatsApp communication.

SELECTED EDVANCE TECH PROJECTS

CarWash Connect

Multi-business car wash management platform

- Built vehicle check-in, wash-status, personnel assignment, service pricing, payment and collection workflows.
- Implemented vehicle-size pricing, daily operational metrics, monthly reporting and Edvance Tech platform billing.
- Designed business-separated staff access and deployed the Django/PostgreSQL platform on Railway.

[Live platform](#)

SpareQuote

Multi-shop auto-parts quotation platform

- Created a single-request quotation workflow connecting customers with participating spare-parts shops.
- Built secure shop accounts, quote submission and acceptance, request tracking, vehicle details, licence-disc uploads and QR-based access.

[Live platform](#)

Hlophe Online Ordering

Ordering and operations management system

- Built QR-based customer ordering, dynamic menu pricing, staff order workflow, Braai Master assignment and order history.
- Added owner settlement reporting and platform-fee tracking, with Django authentication

and PostgreSQL production storage.

[Live platform](#)

AMLO Shoe Store

Django footwear catalogue and WhatsApp enquiry website

- Developed category and product management, multiple product images, responsive catalogue pages, WhatsApp enquiries and SEO foundations.
- Configured PostgreSQL, production static files and Railway deployment.

ADDITIONAL DEVELOPMENT

AI Study Assistant • FaceSight AI • StreamFinder

Additional work demonstrates LLM/API integration, browser-based AI, healthcare workflows, REST APIs, JavaScript interfaces and database-driven application design.

EARLIER PROFESSIONAL EXPERIENCE

Bed Booking Administrator - Raslouw Private Hospital | Jul 2023 - Present

- Manage patient admissions, bed allocation, occupancy records, reporting and patient-flow coordination.

Administrator - Netcare Waterfall Hospital

- Managed healthcare administration workflows, documentation, operational processes and departmental coordination.

Help Desk Support - NKN Consulting

- Provided hardware/software troubleshooting, user support and IT support documentation.
