Professional Summary

Junior Python/Django Full-Stack Developer specialising in AI-powered and data-driven web applications. Experienced in building full-stack solutions using Python, Django, JavaScript, PostgreSQL, and REST APIs.

Combining software development skills with experience in IT support and healthcare administration, I bring strong problem-solving ability and a practical understanding of building technology solutions that improve business and operational workflows.

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3, SQL

Frameworks&Tools: Django, Django REST Framework, Bootstrap, REST APIs, Git, GitHub, VS Code

Databases: PostgreSQL, SQLite

AI&Development: Groq API, Llama Models, AI Integration, JSON Processing, API Integration

Additional Skills: Responsive Web Design, Authentication Systems, Database Design, IT Support

Projects

Career Pilot AI – AI Career Assistant Platform

AI-powered career management platform built with Django to analyse job descriptions, match skills, and track career progress.

Tech: Python, Django, Django REST Framework, PostgreSQL, JavaScript, Groq API, Bootstrap

- Developed AI-powered job analysis using LLM integration.
- Built CV/job matching features to identify skills gaps.
- Created application tracking dashboard and career metrics.
- Implemented REST APIs with authentication.

AI Study Assistant – AI Learning Platform

AI-powered learning application providing automated summarisation and quiz generation.

Tech: Python, Django, Groq API, JavaScript, Bootstrap

- Integrated Groq Llama models for AI-generated learning content.
- Developed quiz generation and summarisation features.
- Built dynamic interfaces connected to Django services.

FaceSight AI – Facial Analysis Application

Browser-based AI facial detection application using machine learning technologies.

Tech: Django, JavaScript, TensorFlow.js, face-api.js, Bootstrap

- Implemented webcam-based facial detection.
- Added age, gender, and emotion estimation features.
- Developed backend services supporting AI functionality.

Hospital Patients Management System

Healthcare management platform for managing patients, appointments, admissions, and workflows.

Tech: Python, Django, Bootstrap, PostgreSQL/SQLite

- Developed patient and appointment management modules.
- Designed database models using Django ORM.
- Created structured healthcare workflow solutions.

StreamFinder – Streaming Discovery Platform

Full-stack Django application for discovering streaming content.

Tech: Python, Django, JavaScript, Bootstrap

- Built responsive user interfaces.
- Developed backend application structure.
- Implemented organised data handling.

Eddie's Gamehub – E-Commerce Platform

Gaming e-commerce application with product and shopping functionality.

Tech: Python, Django, JavaScript, Bootstrap

- Developed product catalogue and shopping cart features.
- Implemented order management functionality.

Professional Experience

Netcare Waterfall Hospital – Administrator

- Managed healthcare administration workflows and documentation.
- Supported operational processes and record management.

- Coordinated departmental requirements.

Raslouw Private Hospital – Bed Booking Administrator

- Managed patient admissions and bed allocation processes.
- Maintained occupancy records and operational reports.
- Supported patient flow coordination.

NKN Consulting – Help Desk Support

- Provided hardware and software troubleshooting support.
- Assisted users with technical issues.
- Maintained IT records and support documentation.

Education

Web Programming Bootcamp Certificate – 2026

Full-Stack Web Development (Python/Django, JavaScript, Databases, APIs)

Diploma in Tour Operations

Rosebank College Braamfontein

Matric

EPP Mhinga High School

Professional Interests

Focused on developing scalable web applications using:

- Python and Django backend technologies
- AI-powered application development
- REST API design and integration
- Database-driven systems
- Healthcare technology solutions
