Professional Introduction

I am a Junior Python/Django Full-Stack Developer specialising in building AI-powered, data-driven, and user-focused web applications.

My experience includes developing full-stack solutions using Python, Django, JavaScript, PostgreSQL, REST APIs, and AI integrations. Through projects such as Career Pilot AI, AI Study Assistant, FaceSight AI, and healthcare management systems, I have gained practical experience designing applications that solve real-world problems.

I combine software development skills with a background in IT support and healthcare administration, giving me a strong understanding of technology, business processes, and user needs.

Technical Expertise

Backend Development

- Python
- Django
- Django REST Framework
- REST API Development

Frontend Development

- JavaScript
- HTML5
- CSS3
- Bootstrap
- Responsive Web Design

Database & Tools

- PostgreSQL
- SQLite
- Git & GitHub
- VS Code

Artificial Intelligence

- Groq API Integration
- Llama Models
- AI-Powered Applications
- Data Processing

Selected Projects

Career Pilot AI

AI career assistant platform providing job analysis, CV matching, skill gap identification, and application tracking.

AI Study Assistant

AI learning platform offering automated summarisation and quiz generation.

FaceSight AI

Browser-based facial analysis application using machine learning technologies.

Hospital Patients Management System

Healthcare management platform designed to improve patient and administrative workflows.

Career Objective

I am seeking opportunities as a Junior Full-Stack Developer where I can contribute my Python/Django skills, continue growing as a software engineer, and help build reliable, innovative technology solutions.

Availability

Open to Junior Developer opportunities:

- Python/Django Development
- Backend Development
- Full-Stack Development

- AI-Powered Application Development
- Healthcare Technology Solutions
